

This week in Caterpillars class....

We made smoothies using different fruits and talked about how they tasted.

We talked about how sugar can be bad for our teeth and how to properly take care of them.

We talked about our 5 senses. Each day we discovered a different unusual fruit to look, smell and feel. Some of them included: Pomegranate, star fruit & passionfruit.

We played match the fruit to the cut up image and then did paintings of the inside of different fruits.

We worked on our fine motor skills by looking at different screws and how they worked.

Next week in Caterpillars class....

- Looking at the book 'Supertato' with props.
- Creating puppets based on the characters to act out the story.
- Making superhero masks to use for a supertato obstacle course.
- New police station role play.
- Drawing self portraits and discussing what makes them a good person.
- Talking about kindness and listening and how to make a friendship potion.

Keep Cool & Safe

As the sunshine continues, we want to make sure your little ones are safe, cool & comfortable while they enjoy their day with us.

Here is what we kindly ask you to do each day:

Sunhat

Please pop a named sunhat in your child's bag / keep one at nursery to keep them shaded during outdoor play.

Water Bottle

Send your child in with a named water bottle. We will keep it topped up and offer water regularly throughout the day.

Suncream

Please apply suncream before nursery. Our team will reapply it during the day to keep the children protected when outside.

Clothing

Light, breathable clothing is ideal to help children stay cool and comfy while they move and play.

Thank you for your support

Summer club runs from 8.30-5.00pm

Limited places available

caterpillars
